Safe Records: 3 (75.0% of all records if total else 0.0)%
Threshold Used: 0.5

Threat vs Safe Overview

Threat Severity Distribution

Risk Score Assessment

Key Predictions

• High Threat: 1 records
• Low Threat: 3 records

Security Recommendations

1. Isolate all critical and high-risk assets identified in this report.
2. Quarantine files flagged as Threat for deeper manual or sandbox analysis.
3. Monitor suspicious activity patterns for unusual behaviour over time.
4. Harden perimeter firewalls and IDS rules against most common threat types.
5. Enable continuous live monitoring to detect new threats in real time.
